Ref: CALFED Phase 2 Report

Dear Mr. Breitenbach,

As a member of CalTrout and the Conservation Director of the Conejo Valley Fly Fishers, I appreciate the opportunity to review the Phase 2 Report recently released by CALFED.

It is our belief that there are many alternatives that would better serve the citizens of California rather than alternatives incorporated in the Phase 2 Report. These alternatives would include additional water conservation practices for municipal and agricultural customers, an increased emphasis on groundwater storage capabilities as opposed to new dam and reservoir projects, and additional water quality improvements for the waters of the Bay-Delta area.

Your consideration of our views on this issue would be greatly appreciated.

Sincerely,

Paul R. Avery
